磁助电接点压力表

Magnetic electric contact pressure gauge

YXC 系列
YXC series

YXC 系列

磁助电接点压力表

YXC series
magnetic electric contact pressure gauge

概述

YXC 系列磁助电接点压力表适用于测量无爆炸危险的流体介质的压力。其中 YXCA-150 适于测量氨的液体、气体或其混合物等介质的压力。通常，它配以相应的电气器件(如继电器及接触器等)，即便能对被测(控)压力系统实现自动控制和发信(报警)的目的。

YXC 系列有普通型和耐震型两种形式，且具有现场安装式和嵌装式两种形式；YXCG 系列除了具有上述特征外，还具有能测量温度较高、粘度较大或腐蚀性较强的介质压力。

本系列仪表采用了磁力作用的电接点装置，并采用了相应的耐震措施和应用了隔测原理，使之既能耐受工作环境的振动影响。又能有效地减少脉动压力的影响，以达到动作稳定可靠、使用寿命长的目的。

Description

YXC series magnetic electric contact pressure gauge is suited for measuring the pressure of the fluid media without explosive danger. YXCA-150A is suited for measuring media pressure of the liquid and gas or ammonia or other composite.

Generally, it is fitted with corresponding electric element(such as relay and contactor which will be able to achieve auto control and alarm to the monitored pressure system).

Series YXC has two forms which are common type and pulsation-proof type and also has two mounting ways which are field installation and plug-in type; Besides the above features, series YXCG has the function of measuring the pressure of media with high temperature, great viscosity or strong corrosion.

This series adopts electric contact unit with function Of magnetic and also adopt corresponding pulsation-proof measures and isolated principle which can both endure the vibration in the working environment and reduce the effect of pulse pressure, thus achieving reliable work and long service life .

技术参数

- 最高工作电压: DC220V 或 AC380V
- 触点功率: 30VA(电阻负载)
- 控制方式: 上、下限缓行磁助接点开关
- 使用环境条件: -40~70°C, 相对湿度不大于 85%
- 温度影响: 使用温度偏离 20 ± 5°C 时, 其设定点误差变化不大于 0.6% / 10°C

Technical parameter

- Max working voltage: DC220V or AC380V
- Contact power: 30VA(resistance load)
- Control way: upper / lower limit delayed magnetic contact with
- Using environmental condition: -40~70°C, relative humidity no more than 85%
- Temperature effect: the error change of setting point will be no more than 0.6% / 10°C when the deviation of using temperature is 20 ± 5°C

防爆电接点压力表 explosion-proof electric contact-pressure gauge

YX-160-B 系列
YX-160-B series

YX-160-B 系列 防爆电接点压力表

YX-160-B series
explosion-proof electric contact-pressure gauge

概述

防爆电接点压力表按 GB3836.1-83《爆炸性环境用防爆电气设备通用要求和 GB3836.2-83《爆炸性环境用防爆电气设备隔爆型电气设备“d”》的有关规定及相关标准进行设计，并经由国家指定的检验机构所审批的图样和技术文件进行制造。防爆合格证编号：GYB90221。

仪表的防爆类别为 II 类隔爆型 B 级 T4 组，其标志为 d II BT4。
仪表适宜在有爆炸危险的场所内用来测量非结晶、非凝固的爆炸性混合物或各种无爆炸的介质压力。

仪表可与具有相应防爆性能或采取相应的安全措施的电气器件(如继电器及接触器等)配套使用，便能对被控系统实现自动控制和发信(报警)的目的。

Description

Explosion-proof contact pressure gauge is produced based on GB3836.1-83 "General requirements on explosion-proof equipment" and GB3836.2-83 "General requirements on explosion-isolation equipment, d". Approved by national verification offices. Certificate number is GYB90221.

Explosion-proof grade II, explosion-isolation grade B, T4, mark is d II BT4.

Gauge measures pressure of explosive medium that are not crystallized, not condensate or normal medium which are not explosive.

Matched with related electric element (like relay and contactor), it can control system automatically and alarm.

- 控制方式: 上、下限缓行接点开关
- 最高压作电压: DC 220V 或 AC380V
- 触点功率: 10VA
- 工作位置: 垂直安装
- 使用环境条件: -10~50°C, 相对湿度不大于 80%, 且爆炸性混合物应属于 II B 级 T4 组以下, 且工作振动和被测介质的急剧脉动应对仪表触头的可靠动作而影响。
- 温度影响: 使用温度偏离 20 ± 5°C 时, 其设定点误差变化不大于 0.6% / 10°C。
- 绝缘强度: 50HZ 正弦交流电 2000V 历时一分钟
- 重量: 6kg

- Control: upper and lower limit slow contact switch
- Max voltage: DC 220V or AC 380V
- Contactor power: 10W
- Location: vertical installation
- Environment:-10~50°C, relatvie humidity not more than 85%, explosive Mixture is within IIB T4, vibration and medium fluctuation has no impact to gauge actions;
- Temperature impacts: setting point error is not more than 0.6%/10 °C
- When temperature deviation is 20 ± 5°C
- Insulation: one minute for 50HZ 2000V circuit
- Weight: 6kg
