膜片压力表 diaphragm manometer

YPF 系列
YPF series

YPF 系列 膜片压力表

YPF series
YPF diaphragm manometer

概述

膜片压力表适用于测量具有一定腐蚀性、非凝固或非结晶的各种流体介质的压力或负压。

Description

The diaphragm manometer is suitable for measuring pressure or negative pressure of various fluid media which has certain corrosion, non-coagulation or non-crystal.

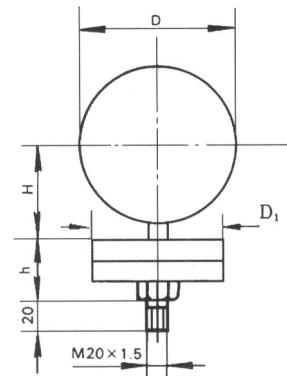

技术参数

- 精确度等级: 2.5 级
- 使用环境温度: -40~+70°C
- 相对湿度不大于 90%
- 温度影响: 使用温度偏离 20 ± 5°C 时, 其温度附加误差不大于 0.04% / °C ,
- 工作位置: 垂直安装
- 外壳防护等级: 符合 IP64
- 仪表技术性能符合行业标准 JB / T5491-91《膜片压力表》的规定

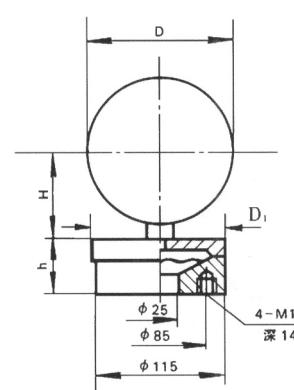

Technical Parameters

- Accuracy class: class 2.5
- Using ambient temperature-40~+70°C
- The relative humidity is no more than 90%
- Temperature influence: When application temperature deviation 20 ± 5°C, its temperature additive error is no more than 0.04% / °C
- Working position: vertical installation
- housing protection class: Conforms to IP 64
- The technical performance conforms to professional standard JB/T5491-91 "Diaphragm manometer" stipulation
